1. Welcome and introductions.

2. Minutes of 11/19/9; Motion by Licklider 2nd by Retallick. Approved.

3. Credit Limits: Zunkel provided overview of current policies and discussions about changing the policy. She will bring the subject back to this committee for a decision. There was some question whether it was relevant to this committee.

4. Abelson and Zunkel provided an update on the implementation of the waiver of international perspectives for students with international overseas experience. Still working on administrative details to implement.

5. Math courses: Discussion continued about MATH courses which started at the previous meeting with respect to using ALEKS to better place students. Data was provided on the courses with high percentage of students with scores below C. The issue of poor success rate of students in some math courses was discussed. The following themes emerged:
   a. The issue needs to be considered as an investment in instruction instead of an expenditure given the high cost to recruit students to ISU
   b. The attrition of students needs to be looked at with respect to these courses
   c. Support should be provided for these important courses.
   d. Particular interest in the courses which primarily rely on WebCT for delivery.
