College of Veterinary Medicine
2016-2017

I. SIGNIFICANT TRENDS:

This year did not see any significant changes to the curriculum or to curricular processes at the ISUCVM. Our efforts have focused on improving clinical competency assessment processes and curricular management processes. Specifically, we have nearly completed a complete update of curricular mapping (Years 1-3), and have initiated a new process for identifying students who may have deficiencies in clinical competency assessment throughout the fourth year. Student scores are reviewed on a monthly basis, and students showing a deficiency are provided remediation. Additionally, given assessment information, a financial literacy module has been implemented as part of our core course VCS 311 “Careers.”

II. CURRICULA, MAJORS, MINORS ADDED OR DROPPED:
